PROPOSED EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Junqi Hang on 29 June 2009.

The application has been amended as follows:

In the Claims:

- Claim 1 (Currently Amended) A method of obtaining recombinant mature Concanavalin A protein expressed in a bacterial host cell comprising the steps of:
 - (a) expressing said recombinant Concanavalin A in a bacterial host cell;
 - (b) producing a lysate containing said Concanavalin A, wherein said lysate has both a soluble and insoluble fraction wherein said insoluble fraction contains Concanavalin A that has a reduced glycogen content and, if present, any glycogen present in the lysate remains in the soluble fraction the insoluble fraction of said lysate has a reduced glycogen content; and
 - (c) recovering said Concanavalin A.
- 2. (Currently Amended) [[A]] The method as claimed in claim 1, wherein the soluble and insoluble fractions are the result of comprising adding a buffer to the lysate, wherein said buffer has such properties that glycogen originating from the bacterial host cell is soluble in the buffer, whereas said Concanavalin A protein is insoluble in the buffer.
- Claim 14 (Currently Amended). [[A]] The method as claimed in claim 1 further comprising the step of removing any residual glycogen-Concanavalin A complex formed.

- In claims 2-14 and 16-19: Delete the first - - - A - - - and replace with - - - The - - -.
- Claim 22 (Currently Amended). ~~The use of a buffer~~ A method of using a buffer in which glycogen is soluble, but in which ~~a glucose-binding protein~~ recombinant Concanavalin A is insoluble in the method of obtaining the recombinant ~~glucose binding protein Concanavalin A~~ expressed by a ~~non-plant~~ bacterial host cell according to claim 1.
- Claim 45 (New). The method of claim 1 further comprising denaturing, refolding and recovering said insoluble Concanavalin A to produce a mature active form of Concanavalin A.

Election-Restriction

2. The restriction requirement between Groups I and II as set forth in the Office action dated 02/05/2008 is hereby withdrawn. Said claim 22 (Group II) is rejoined with Group I.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The claims are drawn to methods of purifying recombinant Concanavalin A (ConA) whereby the method involves either utilizing a buffer in which upon the lysing of the bacterial host cells in which ConA was expressed, said buffer keeps ConA insoluble by any glycogen soluble the precluding the formation of a complex (e.g. ConA:glycogen) from forming; additionally the bacterial host cell can also be mutated in the glycogen synthesis genes so no glycogen is formed. In this way, a highly active form of ConA can be utilized. A

careful search of the prior art reveals that the formation of said ConA:glycogen was never recognized as problem in the expression/purification of the recombinant ConA and that by preventing the formation of said ConA:glycogen formation that this would induce a highly active form of mature ConA in significant quantities when expressed in bacterial host cells which had always been a hurdle not overcome in the art. Thus, claims are novel and non-obvious and **claims 1-14, 16-19, 22 and 45 are allowed.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SUZANNE M. NOAKES whose telephone number is (571)272-2924. The examiner can normally be reached on 7.00 AM-3.30 PM.
